Dear Ms Nanandi,

With reference to the complaint logged by you regarding the overloaded truck that you observed in Moorreesburg.

I went to the Delico Abattoir on 6 December 2022. The sheep in question were already offloaded. I went to the camps where the sheep were kept. There were no sheep with any injuries. All the animals had water, food and shelter.

I was presented with the paperwork for the transportation of the sheep in question.

The truck has a capacity of 450 sheep. 150 per deck. This particular load only had 375 sheep.

We will keep on doing inspections at this Abattoir facility to ensure that there are no contraventions of the Animals Protection Act.

Kind regards,

Patrick Chiwawa
Inspector
Swartland and West Coast SPCA
