Water, food and shelter observed. The body condition of the animals observed is fair and acceptable. I did not observe any dog with prolapse. The female dog is the only dog that is unsterilized. I phoned the complainant and she told me that she did not see the dogs but only heard by someone else. I will do another re-check when in the area.

There was no people at this property and I only observed the two dogs from the gate where I was standing. The body condition of both dogs is fair and acceptable. I couldn't see if there was water available as the property is very big. I will re-check when in the area.
