Comments: Assign Inspector Warnings-Issued
The two dogs are confined in a small camp. There was dog faeces lying around.
I observed water, food and shelter.
The ear infection is almost dry and on the warning I advised to seek Vet Treatment .
The dog named Boy is the one with the ear infection. The other dog's body condition is fair and acceptable.
I issued a warning and it was accepted by Tinashe, who introduced himself as Mr Right Mirisau's son.
Mr Mirisau was not at home. I gave a 24 hour warning.

The owner was not at home and I spoke to Norman who is the son of Mr Mirisau.
Both dogs are now on long chains and I observed collars, water, food and shelter. Norman told me that his father brought some ointment and applied it to the dog's ear. He told me that he does not know where the ointment is.
The area around the dog kennels is also clean. I educated the advantages of sterilizing the dogs and Norman told me that he will speak to his dad.
I will do a re-check when in the area.

There was no people at home, but I could see the 2X brown & white dogs, both on long chains with collars around their necks.
I could not see if the water bowls have water in it because I could not enter the property. The body condition of both dogs is acceptable.
I will do a re-check when in the area.
