Lesley-Ann stopped me to ask for some advice regarding her black PitbullX female.

Lesley-Ann wanted to know what cause her dog to scratch herself so mucn.

I observed the dog but could not see any ticks or fleas on her.

The dog has shelter, food and water available. Body condition is acceptable.

The dog is also loose on the property.

I inspected the dog's living area and it was also clean.

Property is not fully fenced.

I advised Lesley-Ann to get her dog a Bravecto.

Lesley-Ann's property is not fully fenced so other dogs can come and infect her dog with parasites.

Will do a re-check.

2022-03-15 15:18 Being Investigated Re-Check

The black Pitbull female is in acceptable condition.

Lesley-Ann told me that they got the dog a Capstar at the Vet and she has not been scratching herself since.

Water, food and shelter is available.

Will do a re-check.
