There was no water available for the pigs and there is foreign objects in the pig sty. I observed one sow that is very thin. The owner was not at the small holding and after I issued a warning I gave it to one of his neighbors Mr Phumsile Mlonyeni of 37 Madeliefie street. I will re-check in 24 hours.

When we arrived at this pig sty there was no people and I observed water and shelter. The thin pig is now confined in her own camp. The foreign objects are not cleared yet. One of the small farmers advised us to go to the Municipality where Alfred work at 08.00 tomorrow morning so that we can meet him.

Together with inspector Fortuin we went to the Municipality in Darling and we met Mr Alfred . He told us that the sow have piglets but he confirmed that he is going to the vet at 13.00 when he is on lunch. He gave us his contact number.

The thin pig that we saw on our previous visit is not getting any better. The pig is thin and she rubs her body against the pole and now she has sores on her body. There was no people at this small holding. There was food in the feeding trough but it seems the pigs don't like the feed because inspector Fortuin brought some feed and we gave it to the pigs and within a few minutes it was finished. Water and shelter observed. We decided to go issue a warning at Alfred's place of work the following morning.
