2022-03-01 18:00 Assign Inspector Warnings-Issued

I observed three piglets that look under weight. Phumzile arrived with the water when I was already at his small holding. He refilled the water buckets. Food and shelter observed. The pig sty has foreign objects. I issued a warning and will re-check in 3 weeks to see if the body condition of the piglets improved.

There was no people at this small holdings. There is five piglets that are under weight and need to improve the body condition. I also observed about 6 pigs that have a skin problem and I issued a warning advising the owner to get Detomax for all the pigs with the skin problem. Water, food and shelter observed. The warning is for 5 days and I will re-check.

2022-03-29 18:40 Assign Inspector Re-Check

There was no people at this small holdings, but one of the farmers confirmed that the pigs were vaccinated on Saturday. He told me that he bought Detomax. There was one dead piglet in the pigsty. I observed water, food and shelter. I phoned Phumzile informing him of the dead piglet and he told me that he was at work in Atlantis. I will keep monitoring the condition.
