Observed ± 7 dogs including the 2 puppies in question on the property. The owner was not present but Richard the guy who works there let me in to do an inspection. The adult dogs are all in an acceptable condition but the 2 pitbull puppies has fleas and worms. I also observed water and shelter for the dogs. I issued a warning for providing treatment for the worms and fleas. I also told Richard to tell the owner that he must dip his dogs regularly to prevent tick and flea infestation and also to deworm the dogs every 3 months. Will do a re-check.
