The dog was laying under the trailer in front of a dog kennel. I observed water also. There was no people at this address and one neighbor told me that Ronaldo works on a farm near Gouda and only gets home after 5 pm so i left a warning advising him to contact me. I could not observe the body condition of the dog as she was laying under the trailer. Will re-check in 24 hours.

Water and shelter observed. The dog is thin and Ronaldo told me that the dog is thin because of the puppies but i could see that the dog lacks proper feeding. I issued a 3 week warning advising Ronaldo to improve the dogs body condition and feed the dog. I will re-check in 3 weeks. Ronaldo told me that the dogs leg injury happened 2 years ago. I don't think that there is need for vet care as the dog walks around and Ronaldo stretched the dogs leg and you could see that the dog does not feel any pain. Ronaldo also told me that as soon as the puppies starts feeding dog food he will surrender the mother dog.
