Nicker is on a short chain of between two to three metres long and I observed a collar on her neck. Bruno is running freely inside the property. Bridget told me that Nicker likes to chase kids and cars in the street as the property is not properly fenced. Water and shelter is available for both dogs. The body condition of both dogs is fair and acceptable. I issued a warning for the short chaining of Nicker and I will re-check in 7 days.

Both dogs are now loose inside the property. Water and shelter observed. The body condition of both dogs is fair and acceptable. I will do another re-check when in the area.

Miel told me that the male brown & tan dog was poisoned but after I asked him about the symptoms of the dog before he died, I suspect that the dog died of distemper. I explained to Miel the importance of having his dogs vaccinated so as to prevent the dogs from getting the disease. The remaining dog is in a fair body condition and I also advised him about the possibility of the two dogs on the property getting the disease. I will re-check again when in the area.
