The GSD is underweight and need to improve on the body weight. The dog has also a skin problem and I issued a warning advising the owner to buy Bravecto and use dip. The skin problem is in it's early stages.
The wirehaired Terrier X and the cats are in a fair and acceptable body condition .
Water, food and shelter observed. I will re-check in 2 weeks.

Chantel took me to the back where I saw the 1X GSD and 1X Wirehaired loose on the property. I did not see the GSD before so I don't know if the dog's condition has improved.
According to Chantel it has. She told me that they got the dog a Nexguard for the mange and his hair is starting to grow back.
I could see that the dog's hair is starting to grow back.
Both dogs body condition is acceptable.
Water, food and shelter was observed.
I will do a re-check after 2 weeks again to check on the dog's skin problem for improvements.
