Comments: 2022-01-25 14:10 Assign Inspector Warnings-Issued
I observed +- 100 chickens inside and outside the enclosure.
I went inside the enclosure and there were some chickens with feather loss.
The 1st enclosure with chickens did not have any water.
The other 2X enclosures had water, but it was dirty.
I also observed old feaces and it looked like the owner has not cleaned the chicken houses for a while.
I also observed some dead chicks in the chicken house.
I also saw some of the roosters attacking each other.
I issued a warning to clean the chicken enclosures and to provide the chickens with fresh potable water daily.
Will do a re-check.
