General Report Comments: I saw 2 male terrier x black in colour running around the house and both of them have mange and the mange has not yet spread the whole body and I spoke with the owner of the dog's about it and that mange is treatable with dip if she can follow the instructions on the pamphlet I gave her and she said she will get a dip to help her dogs. Water and shelter was observed and the body condition of the dogs not acceptable because of the mange.
