General Report Comments: The owner stopped me that there is something wrong with his dog because he eat but is not gaining weight and one is scratching a lot they showed me the food they give the dog and I advised them to take the dog to the vet and also I advised them to change the brand of dog food to try the trusty puppy food. They said they will buy the food and dip them as the pamphlet says. Water and shelter was observed and the body condition of the dogs is not acceptable because of the mange and the weight of the dog.
