General Report Comments: I saw 1 male terrier x on the street and I followed him to the house and I spoke to the owner of the dog is about the condition of the dog is he showed me some products that were used for the dog and I advised them to take the dog to the vet for further treatment because the stuff they were using is not working for the dog. Water and shelter was observed and the body condition of the dog is not acceptable because of the mange. The owner said that I must call first before I come to them because most of the time they are working.
