

14/02/2023

The S.P.C.A brought in 2 dogs that were abandoned by their owners. One was a sterilized male Boerboel – more or less 4 years old. The female was still intact – also a Boerboel cross – more or less 4 years old. Their condition was severely poor – body condition score of 2/5. They had a severe tick burden. They were both severely anaemic. The male's appetite was good but the female did not want to eat. I treated them with Nexgard to remove the ticks and treated them for tick fever as well as tick bite fever.
