General Report Comments: There are 4 dogs on the property I went together with law enforcement to do an inspection. The 3 dogs are kept in a enclosed area. The area is big enough water and shelter available for the dog's. One dog is tied in front of the house on a short rope. All the animals are underweight the female dog Lucy is very emaciated. The owner signed her over to the SPCA. There was dog food available but I educated him that he must buy a better quality food for the dog's and he must deworm them. I gave the owner a warning to put Lucy on a longer rope or runner. The dog's must be dipped or he must get nextgaud tablets tablets for them they must pick up body condition with 14 days.
