General Report Comments: I saw a black female pitbull x dog with 10 puppies. The puppies are still very young. The dog is underweight. There were no water availalbe. Mr May went to fill the water bowl. They feed the dog Bobtail. I advised Mr May that even though she had puppies she is very underweight and that there must always be potable water availalbe. There is a big closed stoep with blankets under a table where the dog is sleeping. It is protected from the weather. Mr May said that they might consider having her sterilised once the puppies are gone. I issued a warning for the owner to ensure that the dogs always have potable water and adequate food and to cover the drains on the stoep where the puppies can fall into. Will follow up.
