VETERINARY PROBLEMS / HEALTH CO	Yes ***	Pigs are very thin and 2x piglets have already died
CONFINEMENT OF ANIMALS	Free roaming - in property	

General Report Comments: I was being proactive at the emerging small farmers in Silvertown Chatsworth,when I was approached by a man call Harry Marais. Harry took me to plot D3 to have a look at the pigs conditions on this plot. I saw 1x Great white sow and 5x 5 month old piglets in the pigs pens. The sow and the piglets are extremely underweight. Two piglets has already died due to starvation and was in the pig pens while I was doing an inspection. There was no food or water available for the animals. The pig pens are dirty,full of feaces and I could see that it hasn't been cleaned for some time. Harry told me that the owner has not been on the farm for 3 months and does not bother to buy food. Harry and his friend Howard has been feeding the pigs for so long but they are not able to feed them anymore due to financial problems. According to Harry the owner Mrs. Emelda Saligee does not care because he has called her several times to tell that the pigs does not have food. I issued a warning to provide the pigs with adequate food and water and to provide sick or injured animals with veterinary care. Will follow up within 24 hours.

ACTIONS

Warning Issued W5979

REPORT OUTCOMES

Follow-up inspection to be conducted 2023-08-17
