General Report Comments: Antoinette let me on the property and we went inside the house where I observed 1 x African grey parrot called Neo inside his cage. The cage is big and the space is enough for one parrot. Food and water was observed inside the cage and also a lot of toys. The bird is in good condition and I did not observe any signs of feather plucking. The bird is also provided with a rich nutritional diet and not just sunflower seeds. Antoinette told me that they sometimes takes Neos cage outside so that he can have some fresh air but they will never leave Neo in the sun for the whole day. No welfare concerns was observed. Nfa until further notice.
