Follow-Up Date: 2024-03-12
Comments: Phoned the owner, Mr. Alwyn Hannekom (0731867947)

The cow with the suspected eye condition (20 095) has been seen by a vet, she has cancer in her eye and the vet is not of the opinion that it is needed for removal.

The 2x cows that are under condition, calved recently in the past 2 weeks, and are giving lots of milk now. They are being treated with Multivin (a vitamin and mineral supplement). It normally takes about 60 days for them to pick up condition.

I advised the owner that I will return in the following 2 weeks to monitor the milking, he was welcoming. When I conduct follow up, routine inspections I will recheck these 3 cattle as well to ensure their condition does not deteriorate.

The owner is rather on the ball with his cattle, and does not seem hesitant to take action when required.
