Comments:	Call received from Arno (NSPCA), I explained what Isabelle recommended and we discussed the entire merit of the case and agreed that it will be difficult to win a case as no suffering can be proved at this current stage. I advised that I will give the owner some time to cool down and then make an appointment with him again to see if he will talk with me and listen where I will then try to convince him to not feed sunflower seeds, unless sprouted and also to include greens in their diet. Arno agreed with this plan.
