Inspector:	CARINA BODENSTEIN

Type:	RE-CHECK
Follow-Up Date:	2024-05-29
Comments:	As I was in the area before the scheduled follow up date, I went past the property to see how Spottie is doing. Willene met me outside the property and informed me that Spottie was likely poisoned as one morning Spottie was just found dead inside her kennel, about 2 weeks ago. There was no signs of Spottie, and she was apparently buried in the back yard. Spottie was on treatement for her skin, and I was shown the cream and shampoo used. I will do a routine final check regarding the other animals on the property in a few weeks time before I close the case.
