Comments:	I met with the complainant in the road where she discussed the case with me. Margi explained that the dog is on a runner and a long chain but she does not understand why the dog is not free roaming as the owners advised to her that the dog is chained because the dog is a pitbull. She feels they must then not have the dog and get another dog. She also mentioned that the owner chased her off the property telling her to "fok of" and that she must not dare to go back to his property. I do not hink it is advisable to go to the property today as Margi (complainant) heated things up and this will cause an unnecessary up roar. I also dont think this is an actual cruelty case, however I will go to the property on monday and do a general living condition check.
