Comments:	I received a call from Yolanda. She advised that she is working again, hence she was not at home. I asked where the dog was and she said that her son took the dog temporarily to a friend, as they will only be able to complete the enclosure this weekend, and she did not like seeing the dog on the chain. The dog is apparently free roaming at the friends house. She could however not give me the address of where the dog is currently. She advised that the dog will be back at her property on Sunday. I will conduct an inspection on monday to verify the build of the enclosure and the return of the dog.
