Comments:	I received a call from the owner, advising they wont be home today and asked if I can come next week Tuesday. As she would like for the inspection to be done when she is present. I asked if they could install a runner, she said yes, but require my assistance, as she does jot think they did it right. I asked who will be looking after the dog in their absence, she said her sister and boyfriend will stay in the house the weekend and look after the dog as well. I agreed to meet her next week.
