Type:	CALL RECORD - RECEIVED
Follow-Up Date:	2024-10-16
Comments:	I received a call from Dr Cowan, she advised that the dog has not returned for his followup check. I advised her that I will be going to the property today to have a look at the dog. She advised that if the bandage is still on, that I take the bandge off and look at the wounds. If the wounds look good, healing and not pussy or oozing that the owner can just keep it clean with salt water. She also advised that I must check the swelling of the leg and if the dog is putting any pressure on the leg. She asked that I let her know, and she will then advise accordingly as she is willing to provide a report if the wound is not healing, so I can apply for a warrant.
