CLEAN LIVING ENVIRONMENT	No ***	Some of the enclosures is dirty,feces lying all over.
ANIMALS IN GOOD CONDITION	Yes	
VETERINARY PROBLEMS / HEALTH CO	No	
CONFINEMENT OF ANIMALS	Caged - adequate space	Petting farm

General Report Comments: .I went to do a recheck at the Westcoast farm stall petting farm . I was met by the manager Irene who asked Abraham one of the workers to accompany me doing an inspection o the animals . We went to the first enclosures where all the small parrot species are being kept like,the budgies,kakarikis,lovebird,cocakatiels,and conjures are kept. Water bowls was green with algae that indicates that it has not been clean recently,food bowls are dirty and sticky that indicates that it is not being washed and just gets topped up with fresh food. In some of the enclosures I observed accumulated bird feces which also indicates that enclosures has not been cleaned regularly. Birds are in fair conditions, no feather plucking observed,no injuries or dead birds observed. Next we went to the big Avairy where the,African Grey's,Macaws,Cockatoos,Eclectus,Galah and Amazon parrots are being kept. Owners are currently busy renovating the aviary so the parrots are all being kept in different enclosures, species specific. The same issues was addressed here,water bowls green,feed bowls dirty,accumulated bird feces. Birds in fair condition,no sick,injured or feather plucking was observed. I proceeded with Abraham who is assisting me to the enclosures of the rabbits and the guinea pigs. Rabbits enclosure needs to be cleaned,rabbit droppings all over. Enclosure is big enough for the rabbits with a lot of hiding spaces and tunnels. Guinea pigs enclosure was clean,fresh water and food observed,I've seen the guinea pigs drink water and all of them can reach the water bowl. I then proceeded to the enclosure of the pigs. I observed 2x adult pigs and 3x juvenile pigs. The enclosure was not cleaned,there were no dry place for pigs to rest. Enclosure needs to be cleaned and fresh bale needs to be provided for bedding. Pigs body condition is acceptable and they do have water and food. We went to the big camps at the back where the donkeys and Alpacas are roaming freely. In the donkeys enclosure I observed accumulated manure which indicates that they have cleaned here recently, living area not clean. Fresh water and food observed and the donkeys body conditions is acceptable. Next to the donkeys enclosure is the Alpacas. Fresh oathay mixed with Lucerne cubes was observed and fresh water. Enclosure was clean. Alpacas body condition is acceptable. I issued warning W5512 with all the concerns that I noted. Will follow up within 7x days.

ACTIONS

Warning Issued W5512

REPORT OUTCOMES

Follow-up inspection to be conducted 2024-10-01

INSPECTION ANIMALS
