General Report Comments: I saw 1x black and tan Gsd x on a long static chain. The dog did not have a collar around his neck and the shelter that the dog has is not adequate. Mr. Ackers came out and I explained to him that I'm going to issue him with a warning to rectify these issues because my colleague has been here twice already and has given him more than enough time to work on this issues. Mr. Ackers went inside the house and came out with a collar and told me that the dog keeps on getting out of this collar. I told Mr. Ackers to make the collar smaller and if that doesn't work that he can use a hose pipe and put he chain through the pipe, Mr Ackers understood. I then asked Mr. Ackers about the shelter and he told me that the dog does not like sleeping in a kennel. I told Mr. Ackers to provide the dog with adequate shelter, although the dog won't use the shelter as long as there's shelter available. The body condition is fair. Water was also observed. I issued a warning to rectify these welfare concerns within 72 hours. Will recheck.
