General Report Comments: There was no people at home and I could only saw 2x dogs from the gate inside the property. I saw 1x tan female Labrador x and 1x black and tan terrier x male inside the property. I could see that the female lab x has puppies but I did not see the puppies. According to the complainant the owner is never at home and he does not feed the dogs and that she is feeding the dogs because the lab x keeps getting out and then comes to her home looking for food. I told the complainant that she must stop feeding the dogs because it makes my job so much harder because the body conditions of the dogs is acceptable. I also observed a bucket with water inside the property. The 2x dogs that I have seen is in acceptable condition and they are not underweight or sick in anyway. I left a warning for the owner to contact me regarding the dogs on the property. Will follow up.
