General Report Comments: Upon arrival, I was met and granted access by Johannes.

I observed the black/tan, pitbull x rottweiler free roaming outside the property. This dog broke his runner this morning, the owner is still busy fixing the runner. This dog runs in the road and looks for problems, the dog also tried to bite me while I was busy petting another dog. I asked the owner to consider surrendering the dog, as the dog is a problem. The dog is also limping slightly, but is under treatment, wound spray is administered. The dog apparently got entangled in wire en hurt his leg. The wound healed nicely, and there is no signs of abscess or swelling.

The other dog, Xbreed, white/black/brown, adult was observed at the back side of the property on a short static chain. The owner is also busy fixing his runner as the wire kept folding. I advised him to use stronger wire or a cable.

He asks that I give he a few days then it will be resolved. I advised him that I will return next week.

I did not issue a warning as the owner is in the process to fixing the runners.
