General Report Comments: Upon arrival, it appeared as if no one was home as no one responded to my presense.

I observed the sog of concern chained to a body of a car, the chain is approximately 3m long. The dog also has a raw chain around the neck which has chaved the dog alresdy as the metal residue is evident on his hair. The dog is underweight with a BCS 1.5/5.

I further observed 2x black Pitbullx dogs, one female, one male that were free roaming inside the property.

I issued a warning (W5244) stating:

1. The dog must be assessed by a veterinarian.
2. The dog must be placed on a running chain, refer to leaflet for guidance.

5 days given for compliance.
