General Report Comments: Upon arrival, I was met and accompanied by Cammennita, the owner.

I observed the dog in question chained the right side of the house. The dog is on a light chain that is approximately 8m long. The dog has a washing mashine pipe collar which provideds comfort and no irritation.

The part of the neck that was previously embedded has healed nicely. The skin looks healthy and hair has begun to grow back. There is no open wound or signs of an abscess, or any other reason for concern.

The dog is in good condition with no vetetary or health concerns observed.

I am confident in closing this case as there are no APA contravention and no further intervention is required.
