ANIMALS IN GOOD CONDITION	No ***	Underweight
VETERINARY PROBLEMS / HEALTH CO	Yes ***	Underweight
CONFINEMENT OF ANIMALS	Free roaming - in property	

General Report Comments: Upon arrival at the property, it appeared as if no one was home, as there was no response to my presense.

I observed the dog in question, a male, adult greyhound. The dog is slightly underweight, with his hip bone and ribs being exposed.

The dog is free roaming in a large property and has an XXL IGLOO kennel .

A neighbor at nr 5 approached me and advised that the owner works in the military but there are 2x woman from Vredenburg that come every morning and evening to give the dog food . The owner is apparently due to come home this evening.

The lady also advised that the dog was stolen recently and only found recently. When the dog was gone that is when the dog lost so much weight. She also tried to tell me that tjis is jow a greyhound looks, I quickly corrected her and stated very clearly that the dog is underweight. She then left me and returned to her house.

I proceeded to issue a warning (W5248) stating:

1. The dog is underweight and likely has an underlying medical condition. The dog must be take for veterinary assesement and possible treatment within the following 5 days.
2. Owner must contact me.

ACTIONS

Warning Issued	W5248
