General Report Comments: Upon arrival, I was met and granted access to the property by the Chris Ocks, the owner.

I was accompanied to the back of the property where the Boerboel of concern is kept.

The owner is busy with house renovations, and this hinders the dogs from roaming the entire property, this will be done in the next 3 months. The back yard is large enough to provide the dogs with sufficient roaming space.

The boerboel is in an underweight condition with rib cage, hip bones clearly visible and head sunken in.

The owner was however not of the opinion that the dog is underweight and called the dog being slightly underweight.

I checked the dogs teeth and it appears to have a severe underbite and few teeth, which could possibly be the reason for being underweight.

I proceeded to issue a warning (W5249) stating:

1. Your 1x dog appears to be underweight and likely has an underlying medical condition. The dog must be assessed by a veterinarian and possible treatment provided.

11 days were granted to comply, taking the amount of public holidays now into account.
