General Report Comments: Upon arrival, I was met at the gate by Corne, the owner's, son. He is a minor and cant grant me access to the property. However, the dog is kept in the front yard and I was able to observe how his skin condition has improved. The dog is looking much better and almost all the hair has grown back, it is only around his ears and hind legs where the hairloss, dry skin is visible.

I will do a final check in a months time as the sog should then be fully healed. I will also advise the owner that he needs to continue with the Simparica until the dog is fully healed.
