General Report Comments: I saw 1x brown and white terrier x female lying in front of a house, I stopped and did a close up inspection of the dog. I could see that she is starting to get mange because the fur on her tail is starting to fall out. I asked the owner of the house if the dog belongs to him and he said no and showed me the house where the dog belongs. There was no people at home so I issued a warning to provide the dog with treatment for the early stages of mange before it worsens. Will follow up.
