General Report Comments: Ncedo was at home and this is my second Pro Active at this property . The female Pitbul is thin and Ncedo informed me that the dog has had some puppies. The dog kennel is not adequate as it is open on the other side. There is a lot of feces lying on the ground next to the female Pitbul. The female Pitbul is on a long static chain that is shortened in half and it's now short because of that. The other dog is running freely inside and outside the property and is sleeping inside the house. Water is available for both dogs.
