General Report Comments: Upon arrival, I was mwv by Annetta Rosant, the owner's mother.

I saw 2x dogs on runner. The runners are approximately 4m long with 4m light chains attached. The one dog has a body harness and the other one has a material collar. The dogs have a large kennel to share. The other 3 dogs are free roaming on the property and sleeps inside the house.

The 2x pitbulls appear to be slightly underweight with their ribs and hip bones exposed.

There is only 1 dog limping, MAX, who apparently jumped from the steps and landed wrong. He was not taken for treatment. He is putting some pressure on the leg. When I did a clinical he did not display any signs of pain when pressed upon, there is also no heat.

I issued a warning (W4632) stating:

1. Max must be taken for veterinary treatment
2. All the dogs must be sterilised

Compliance expected within 5 days.
