General Report Comments: Upon arrival, I saw the 2x rottweiler dogs behind the silver gate on the property.

The one dog is in good condition and the other one is slightly underweight with his ribcage and hip bones beginning to show.

According to the owner, the dog looked much worse when he came from Paarl, he is currently looking better, but they have still decided to change the food. They are feeding Montego pellets now for the past week.

I asked when the dog was last dewormed, and the owner was unsure. I advised that he deworms the dog and keep feeding a good nutritional diet.

The owner immediatly called the place where he buys the dog food to enquire if they sell deworming tablets, to which they said they have triworm d. The owner asked that they keep one aside as he will come to purchase it.

As I left the property, they owner left also to buy the dewormer.

The dog is only slightly underweight and I am not of the opinion that the dog requires veterinary treatment at this stage. We agreed that we will give it a few weeks, from deworming, to monitor the dog's weight. If there is no improvement then they will take the dog to the vet.
