General Report Comments: Upon arrival, I was met and granted access by the property owners.

The cattle belongs to their son, Rocky Norris.

They only have 2x cattle left from all the other sold. 1x cow is kept close to the house inside a camp. The cow is underweight but appears to be BAR. The cow was given Dectomax and Kryob+ Liver injections. This cow should be improving condition within the next 2 weeks.

The other cow was laying in the field and did not want to stand up. The cow did not show any strange signs, except for laying down and having pale gums.

A warning was issued to either provide vet treatment or humanely slaughter the cow by 09h00 tomorrow morning.
