General Report Comments: Cecile the owner came out and I asked her about the Boston terrier with the growth, she told me that the dog belongs to her partner and they are busy with a divorce so he came to fetch the dog. Cecile also told that the Boston terrier had that growth since she was sterilized a few years ago and that the vet that time said that it's not cancerous. The wirehaired terrier x male is still loose on the property and in acceptable condition. Water, food and shelter was observed. The Boston terrier is no longer on the property. Nfa until further notice.
