General Report Comments: I saw 1x white and brown terrier x male lying inside the yard. I could see that the dog is starting to get some sort of skin problem. I stopped and called to see if someone will come out because the door to the house was open. Charne De Kok came out and told me that she is the owner of the dog Bruno. I asked Charne if she knows that Bruno is starting to get mange and if they are treating the dog with something before it gets worse. Charne told me that she is aware of the skin problem because she saw Bruno excessively scratches himself recently. Charne asked me what they can use and I name her few products that the can use and where to get it. I've given Charne 7 days to seek medical treatment for Bruno before the mange starts to get worse. Will follow up.
