General Report Comments: Upon arrival, I went to thr camp where the donkeys were placed for me to inspect them. They are normally free roaming in the veld, which is about 4HA.

All 4 donkeys's hooves have been trimmed and appears to ben in good condition now. No cracks or splits observed. They were walking with comfort and showed no signs of discomfort.

The donkeys arenotherwise also in good condition and no veterinary or health concerns were observed.

I am confident in closing the case, as there are no APA contraventions.

I however educated the owner regarding regular farrier visits and the importance there off . He already has a follow up scheduled with the farrier for September 2024, as the farrier also advised that he will do a light trim every 3 months.
