CHECKLISTS

General Report Comments: Upon arrival, I saw the main gate of the farm closed, which is strange as this gate is always left open.

I tried to enter at another small entrance and went to the workers houses. None of the 4 owners were home. Owner 3's wife came from inside the house and said all the men are currently working on the other farm and they have not been home in the last week. I saw that the swivels have not been installed yet, however not one of the chains were twirled. I asked her when they will be back and she said that she is not sure but hope they will be back over the weekend. It was raining profusely during the time I was here, and she went back into the house before I could ask her more questions.

I briefly checked the dog's, all were utilising their kennels, had their collars on and were still on the runners. It is only the swivels that must be installed.

I will come by Monday, to see that all has been done, as the men are not home to install the swivels currently.
