ANIMALS IN GOOD CONDITION	Yes	
VETERINARY PROBLEMS / HEALTH CO	No	
CONFINEMENT OF ANIMALS	On running chain	Roaming farm animals

General Report Comments: Upon arrival, all the owners were present.

OWNER 1:

The 1x dog is on his runner, with attaching swivels, has a material collar (harness now only used when walking), has water available and a self made kennel which provides adequate protection against the weather elements. The dog is in good condition with no veterinary or health concerns observed.

The puppy is free roaming, and stays with the owner indoors.

OWNER 2:

This owner had 2x dogs, now he only has the one. The male dog was given to his brother who resides in Porterville.

The 1x dog he has now, Female, is still on her runner, with attaching swivels, has an material collar, access to drinking water, an igloo kennel which provides adequate protection against the weather elements. The living area is clean and the dog does not have any veterinary or health concerns.

OWNER 3:

2x dogs. Both dogs are on runners, each runner is approximately 6m long with 3m attaching chains attached to their material collars. The runners are set up in such a way that the chains do not cross, and the dogs cant jump the fence. Swivels have also been installed. The dogs had adequate protection against the weather elements. Had drinking water and a clean living area. Both dogs appeared to be in good condition with no veterinary or health concerns observed.

OWNER 4:

Used to have 2x dogs, he now has a new pitbull puppy(Male, Black/White, 4months old) as well. The female dog and the puppy are free roaming, they have accessto adequateprotectionagainsttheweatherelements, as there is a large self made kennel available. They also had drinking water. The adult male dog is kept on an extended chain, approximately 7m long, and has 180degree, movement space. The dog has a room which he can easily access and provides adequate protection against the weather elements. I could not go near this dog as this dog is extremely aggressive and wanted to attack me.

The living area was still clean and the dogs appeared to be in good condition with no veterinary or health concerns.

The chickens were still seen free roaming on the property, they are in good condition with no veterinary or health concerns observed. The have access to an open structure if they seek shelter, but as they are free roaming they are in the bushes and trees and roam about the farm. The owner gives them poultry pellets 2x day. They had access to drinking water as well.

The owners approached me and asked we if can we assist with sterilization, I advised them about the amount it will cost. They are very keen but do not have the funds at this stage. I will speak with my manager, and ask if we can seek a donar for at least the 3x female dogs.

The owners has uplifted the welfare of their dogs.

I will do a few routine checks to ensure all are still in order.
