General Report Comments: Upon arrival, I was met and granted access by Clint, the owner.

The dog has been placed on a runner, which is approximately 5m long with and attaching 2m light chain. The owner has rectified the kennel to close half of the front opening which no provides adequate protection against the weather elements. The dog unfortunately still has a raw chain as a collar fitted. Clint advised that he asked his mother to purchase a collar for the dog and she will be home on Friday with the kennel. He has in the interim made the chain looser, as to not chafe the neck.

The owner also advised that he bought dewormer for his dog at the local Spar, BobMartin Tablet, and asked me to assist him with giving the dog the tablet. I assisted and the dog is now dewormed as well.

The dog is in good condition with no veterinary or health concerns observed.

I will follow up next week Tuesday again regarding the collar.
