General Report Comments: Sammy the owner of the land went with me to camp 2 on the farm. There I observed +- 20 pigs in the enclosure. The owner was not present. I observed 5x pigs standing in the mud. The person who is looking after the pigs came there and I told him to remove these pigs from this pen because it's too muddy for them to be in, he immediately took the pigs to another pen. Pigs body conditions is acceptable. Water, shelter and food is available. I issued warning W5063 to remove pigs from the muddy area and to also clean that area before any pigs can be put in that pigs pen. Will follow up.
