VETERINARY PROBLEMS / HEALTH CO	Yes ***	Underweight, possible tickbite fever.
CONFINEMENT OF ANIMALS	Free roaming - property not adequ	

General Report Comments: I spoke to Mrs. Peters about the brown and white dog on the property because the dog is underweight. I told her that the dog might have tickbite fever because the black and white dogs body condition is fair and both dogs are getting the same food which means that there clearly something wrong with the brown and white dog. I told her that I'm going to issue warning W5081 to get the dog to a vet to be examined for tickbite fever. Will follow up within 24 hours.

ACTIONS

Warning Issued W5081
