General Report Comments: Upon arrival, no one appeared to be home as there was no response to my presence.

I entered the property as the gate was open. I saw the dog still on his runner of adequate length attached to his material collar with a suitable swivel. The dog's water was seen inside his kennel.

Regarding the dog's body weight, the dog has evidently gained weight if I compare the photos I took at the first inspection versus today. The dog's rib cage and spine are much less visible.

I will come around in 2 weeks time to monitor progress and weight gain.

Since the dog has gained weight, I don't see the need for the dog to be taken for veterinary assessment at this stage and time can be granted to allow the dog to gain more weight.
