General Report Comments: Upon arrival, I was met and granted access to the property by the owner's girlfriend, Thaliana.

I was accompanied to the back of the property where I observed large trees making a canopy for shelter. There are several trees and bushes which provides adequate protection against the weather elements. There is a large 100L bucket with water available for them to drink.

Their living are is clean, no excessive feaces laying around. There was however alot of unused items scattered around in the back yard, but the ostriches do have sufficient roaming space without the possibility of bumping into these items.

They had the ostriches since 2months, they are now about 9months. They are fed 2x day osteich pellets and roams the property and neighbors property to peck grass seeds.

The ostriches appeared to be in good condition with no veterinary or health concerns observed.

I will call the owner tomorrow just to obtain a bit more information from him, regarding his future plans with them. As one is a male and one is a female, and during breeding season they will have problems with them in the yard.
